# TERRA ■ SPECIFICATION

Terra offers a range of high barrier coated laminates that are equipped with excellent barrier properties against water, moisture and grease. In addition, Terra lowers the impact on the environment by 40% compared to PE-coated packaging. With a wide range of possible grammages, we are able to supply a wide variety of market segments.

## FOOD, FLOWERS AND MORE

In close cooperation with barrier coating specialists, we managed to develop a non-PE and plastic-free coated liner. This enables the paper to be easily recycled when it reaches the recycling plant. Not only can the liner be printed, it can also be used on solid board as well as paper bags. Terra is designed in such a way that it can come in direct contact with food, no matter how dry, wet or fatty. Typical end applications for these laminates also include boxes for vegetables, fruits and flowers.

## TRANSITION TO GREATER SUSTAINABILITY

Greener packaging is not only about what raw materials are used, but also about changing the supply chain from manufacturer to end consumer. As Terra is produced and coated inline, our manufacturing facility is able to save transportation and energy costs. This results in a significantly lower carbon footprint.

## OUR PRODUCTS

<b>TERRA K2000</b> Standard bleached kraft	GSM	<b>50 - 55 - 60 - 70</b>
	Water repellency	No
	Grease resistancy	No
	Heat sealable	No
<b>TERRA P3000</b> Standard liner	GSM	<b>48 - 60</b>
	Water repellency	☉
	Grease resistancy	No
	Heat sealable	No
<b>TERRA P5000</b> Printable high barrier paper	GSM	<b>72</b>
	Water repellency	☉ ☉ ☉
	Grease resistancy	☉ ☉ ☉
	Heat sealable	No
<b>TERRA U4000</b> Unprintable high barrier paper	GSM	<b>66</b>
	Water repellency	☉ ☉ ☉ ☉
	Grease resistancy	☉ ☉
	Heat sealable	Yes

Other sizes or special dimensions are available on request. Anyone interested can contact the licensed agent or Neenah Coldenhove sales representative.

### STORAGE AND HANDLING

- Store material in original packaging only.
- Avoid exposure to direct sunlight and extreme weather conditions.

## SUSTAINABILITY

Thanks to our in-house water recovery management we are able to re-use 95% of the water we use for paper production.

We invest in saving and re-using energy. Currently all energy required by the factory comes out of energy released during the production of paper. Residual heat is used for heating offices and the swimming pool in Eerbeek.

All our papers contain high quality fibers and can be recycled up to 7 times.
